**Ans : to : the : Q : NO : 1 :**

Activity diagram resembles old flow charts and some what large activities sequential work following on action sequence and initial condition the element is used to show that action execute In Parallel laundry in presenting series.

A situation where we should use the joining concept is basically a join chars is used to combine now from two or more tables based on a related clomm between them.

Ans: to: 2 Activity diagram

Customer **Sales Department** **ware house**

- Requests for product
- Create new order
- Material pulled out at the inventory
- Recives order
- Prepares the bill
- products shipped
- Pay bill within a week — NO → Mark coustomer defa/tur
- yes → Closes the order
